

FORAKER RATE BILL CREATES A FOURTEEN BILLION DOLLAR RAILROAD COMBINATION

EX-SECRETARY OF THE NAVY, WILLIAM E. CHANDLER, CALLS ATTENTION TO THE MOST STARTLING FEATURE OF THE RAILROAD MEASURE.

Written by Wm. E. Chandler, Former Secretary of the Navy and Senator from New Hampshire.

The Townsend bill, introduced in the house Dec. 6, seems to contain effective provisions for protecting the public against extortionate railroad rates. The Foraker bill, introduced in the senate on the same day, seems to contain effective provisions for protecting railroad extortion. Look at the two bills side by side:

Townsend Bill.

(I) Whenever upon complaint and full hearing the Interstate Commerce

expense of the government. There may be an appeal to the supreme court and the case shall have preference there in over all but criminal cases.

Foraker Bill.

(I) Whenever the commission believes that a railroad is charging unjust or unreasonable rates it may file with the attorney general a statement and the evidence in support thereof; and thereupon a petition shall be presented to a circuit court sitting in equity which shall summarily make inquiry and issue an injunction against charging any rate in excess of "what the court shall find to be reasonable and

the rate and the railroad must submit, unless a court decides that it is unlawful; that is, that the rate is so low as to lead to the confiscation of the railroad property.

Senator Foraker says that congress cannot give the above power to the commission. The United States supreme court says it can!

The Foraker Bill Protects Railroad Extortion.

Everyone can see this. The commission can only investigate and express its belief that a rate is too high is told to see whether the rate is unreasonable, and if so to issue an injunction against it. This the court will not do because it has no power to do it. Judges can only decide questions of law. It is not a question of law what is a reasonable rate; it is a question of business and common sense—which the judges will not touch. So the Foraker bill is deceptive and worthless—pretending to give a remedy and giving none. This the railroads know, and therefore, adopt this Foraker plan.

The Foraker Bill Creates a Fourteen Billion Railroad Combination.

All the railroads of the United States are authorized and invited to form one huge trust and monopoly and to fix the rates for the whole country. This gives away all that has been gained by the supreme court decisions in the cases of the trans-Missouri Freight association, the Joint Traffic association and the Northern Securities company. In the Joint Traffic association case the nine railroad systems between New York and Chicago formed an organization of three billions of capital, made all the rates and prohibited any one of the roads from lowering any rate without the consent of the nine managers of the trust. The court destroyed this three billion monster. The Foraker bill creates a fourteen billion monster, which will prevent any railroad anywhere in the country from lowering any rate without the consent of the traffic managers of the combination.

No substantial error or omission can be pointed out in this analysis of mine.

SOME FACTS ABOUT PNEUMONIA

By Dr. Ella K. Dearborn.

Pneumonia is classed among the infectious diseases, but more likely the diplococcus-pneumonia is the result of disease, instead of the cause of it. Childhood and old age, those of lowered vitality, and those much exposed to inclement weather and alcoholic beverages are especially liable to pneumonia, and, having had it once, are predisposed to the second attack.

The death rate in the United States for pneumonia averages about 25 per cent and stands next to consumption (tuberculosis) in frequency as cause of death.

It usually begins with a hard chill, and is followed by a high fever, with pain in the lungs and a short, catchy respiration, and a peculiar flushing of the face on the same side of the affected lung, for, fortunately, it more often involves but one lung, and should it be the left side, heart involvements seriously complicates the case.

When taken with a chill it is always best to call in your physician, for a chill usually means trouble ahead, and it is unwise to waste time in home experiments.

While waiting for the doctor put the patient in bed, in a well ventilated room, preferably an upstairs room with southern exposure, and keep an even temperature of 65 degrees.

Oil the chest, both back and front, and cover with a layer of lamb's wool. Avoid cold compresses and ice packs. The food should be light and easily digested, as broths, soups, milk, whey, or well beaten eggs, given raw, and not much of anything at a time, save cold water ad libitum.

I object to spit-cups, and much prefer paper napkins or other soft paper, or cloth, that after use may be placed in a paper bag and the bag burned. Visitors should not be admitted to the sick room; it is bad enough to be sick, without being critically inspected by curious friends, who usually tell doleful stories or maintain a hopeless silence and wear worn countenances that would strike terror to a burglar. If the patient is able to care whether you do or do not call, a card expressing sympathy and good wishes, or a flower, will bear your message, and not injure the patient.

Furious Fighting.

"For seven years," writes G. W. Hoffman, of Harper, Wash., "I had a bitter battle, with chills, stomach and liver trouble, but at last I won and cured my diseases by the use of Electric Bitters. I unhesitatingly recommend them to all, and don't intend in the future to be without them in the house. They are certainly a wonderful medicine, to have cured such a bad case as mine." Avoid all drying inhalants, fumes, smokes and snuffs and use that which cleanses, soothes and heals. Ely's Cream Balm is such a remedy and will cure catarrh or cold in the head easily and pleasantly. A trial size will be mailed for 10 cents. All druggists sell the 50c. size. Ely Brothers, 56 Warren St., N. Y. The Balm cures without pain, does not irritate or cause sneezing.
